S13 – HEALTH & PHARMACEUTICAL INDUSTRY

Reconstruction of Issaka Gazobi Maternity Hospital (MIG) in Niamey

Sponsored by **Ministry of Health and Public Hygiene**
General Secretariat, Directorate of Studies and Planning

ESTIMATED PROJECT COST	LOCATION	FINANCING SOUGHT
EUR 47.5 million	**Niamey**	**Development partners (not specified)**

All monetary figures are in EUR. Converted estimates are indicative and rounded; source estimates may use different valuation bases.

Investment opportunity

The project involves relocating Issaka Gazobi Maternity Hospital (MIG) by rebuilding it on a new site.

MIG currently operates in severely cramped premises, which seriously constrain its operations and the quality of services delivered. Its current location also offers no scope for expansion given its very high level of activity. These constraints limit its ability to fulfill its mission of providing accessible, quality tertiary care.

AT A GLANCE

PROJECT SPONSOR	Ministry of Health and Public Hygiene
TARGET POPULATION	Women and newborns in Niger, particularly in the Niamey, Dosso, and Tillabéri regions
REFERENCE	Project sheet submitted by the sponsor

Objectives

Help reduce maternal and neonatal mortality through the provision of quality tertiary referral care and services

- Build MIG on a new site
- Expand access to tertiary referral care, particularly reproductive health care
- Reduce medical evacuations abroad

Components

1. Component I: Reconstruction of the referral maternity hospital (architectural and technical studies, monitoring/supervision; civil works; roads and utilities (VRD))
2. Component II: Referral maternity hospital equipment (procurement; installation and commissioning)

3. Component III: Human resources (skills development for existing personnel through short- and long-term training; qualified staffing support)
4. Short-term training (Component III): advanced hospital-based training for specialists and allied health professionals. All disciplines will be covered, involving approximately one hundred personnel
5. Component IV: Medical supplies and consumables support

Expected outcomes

Outputs

- A tertiary referral maternity hospital is built and equipped
- Quality tertiary referral care and services, particularly reproductive health care, are accessible

Outcomes

- Quality of maternal and neonatal care is improved

Impact

- Mortality associated with selected diseases is reduced

Strategic alignment

Reconstruction and modernization of Issaka Gazobi Maternity Hospital in Niamey supports Pillar 4 of the 2025–2029 Republic Refoundation Program, which concerns accelerated social reforms and improved access to quality health services. It represents a strategic investment in maternal and child health, human capital development, and national health sovereignty.
